JERONIMO HERDOIZA FUSTILLOS

Infrastructure / DevOps / SRE / Cloud Internship (Available February 2027)

Strasbourg, France jeronimoherdoiza03@gmail.com +33 6 50 21 97 14 github.com/J33r0 LinkedIn

Key skills: Kubernetes (k3s) - Docker - Ansible - CI/CD - GitHub Actions - GitLab CI/CD - Prometheus - Grafana - Linux

Master 2 SIRIS student at the University of Strasbourg, specializing in Cloud, DevOps, distributed systems, system integration and networking. Experience in infrastructure automation, container orchestration, and building CI/CD pipelines. Seeking a 6-month internship starting in February 2027.

SKILLS

Cloud, Containers & CI/CD:	Docker, Kubernetes, k3s, Ansible, Infrastructure as Code, Bash/Shell, GitHub Actions, GitLab CI/CD, GHCR
Systems, Networking & Observability:	Linux, Git (GitHub, GitLab), BGP, 5G, TCP/IP, Traefik, keepalived/VRRP, Prometheus, Grafana, OSPF, IS-IS
Programming & Integration:	Python, C/C++, PostgreSQL, REST APIs, JSON, YAML, etcd, Java, JS, PHP, C#
Languages:	French (Bilingual), English (Bilingual), Spanish (Native), Portuguese (A1-A2), Italian (A1)

PROFESSIONAL EXPERIENCE

Research Intern (5G/Orchestration) - CNRS, University of Strasbourg 2 months - May 2026 - Jul 2026

- Orchestration and automation of the deployment of a 5G traffic generator on the POWDER testbed.
- Automation of remote pipeline execution and metric collection, eliminating manual intervention from the workflow.
- **Dockerization** of the traffic generator and development of a **Bash** runner to automate IP resolution and log collection from **YAML** configuration files, with an orchestration backend (Python) controlled via a web interface.

Research Intern (Networking - BGP) - CNRS, University of Strasbourg 2 months - June 2025 - Jul 2025

- Automation of **BGP** network configuration and acceleration of routing anomaly diagnosis.
- Implementation of an **Ansible** playbook and creation of an interactive debugging tool combining **Python** and D3.js.

Intern in 3D Modeling and Web Development - Universidad Central del Ecuador June 2024 - August 2024

Quito, Ecuador

- Design and deployment from scratch of a PostgreSQL database (relational modeling and administration).

Front-End Web Development Intern - ARQUITECTURA June 2023 - Jul 2023

Strasbourg, France

- Development of a front-end web application and operational management and maintenance of the office IT inventory.

PROJECTS

HA Deployment of a Cloud Application on Kubernetes (k3s) - Individual academic project Feb 2026 - May 2026

University of Strasbourg, France

- Design and deployment of a highly available **Kubernetes** infrastructure on three virtual machines for a distributed application.
- Automated provisioning with **Ansible**, multi-node **k3s** cluster with etcd, encrypted secrets via Ansible Vault, and HA network exposure with keepalived/VRRP and Traefik.
- Creation of a **GitHub Actions** pipeline for building, versioning, and publishing **Docker** images in the **GHCR** artifact registry, followed by continuous deployment of the application.

IoT, Cloud & Observability Platform - Master Project - Ongoing Sep 2026 - Jan 2027

University of Strasbourg, France

- Responsible for SRE, Cloud, and infrastructure architecture: containerization of services and orchestration with **Kubernetes**.
- Design of a **GitLab CI/CD** pipeline to automate building, testing, deployment and infrastructure as code (**IaC**).
- Implementation of observability with **Prometheus** and **Grafana**, and securing the virtual/physical network architecture.

Optimization of AI Performance on Mobile Devices - Research and Study Work (TER) Feb 2026 - May 2026

University of Strasbourg, France

- Acceleration of language model execution (Qwen, Llama-type LLMs) on tablets: up to +30% performance gain compared to OpenMP.
- Design and development in C of an optimized thread scheduler for resource-constrained mobile architectures.

EDUCATION

Master's Course of Engineering: Computer Science, Systems, and Networks (CMI ISR) Sep 2022 - Sep 2027

University of Strasbourg, France

> **Master's Degree in Network, Internet, and Systems Engineering (SIRIS) - Ongoing** Sep 2025 - Sep 2027
>
> **Key courses:** Cloud and virtualization, real-time programming, advanced security, wireless networks, Internet of Things, management.
>
> **Bachelor's Degree in Computer Science - Obtained in June 2025** Sep 2022 - June 2025
>
> **Key courses:** Network algorithms, operating systems architecture, object-oriented programming, databases, communication, law.

Specialization: Cloud, distributed systems, networking, and security.

AWARDS AND COMPETITIONS

1st Prize - Capture The Flag (CTF) UDLA - Extracurricular competition Feb 2021

Universidad De Las Américas, Quito, Ecuador

- Captain of a 3-person team: identification and exploitation of system and web vulnerabilities during a cybersecurity competition.

INTERESTS

- **Sports:** Climbing, Volleyball (coaching), Weight Training, Hiking
- **Leisure:** Sewing, Guitar (self-taught)
